

Webdesktopi aadressi avamine (This page can't be displayed / Turvalise ühenduse viga / SSL Connection Error)

Sisselogimisel võidakse kuvada veateadet, kui Windows'is on võrguadapteril lubatud IPv6 tugi. Vt alt poolt erinevate brauseritega (IE, Firefox'iga, Chrome'ga) kuvatavaid veateateid. Kui IPv6 tugi keelata, peaks sisselogimine õnnestuma.

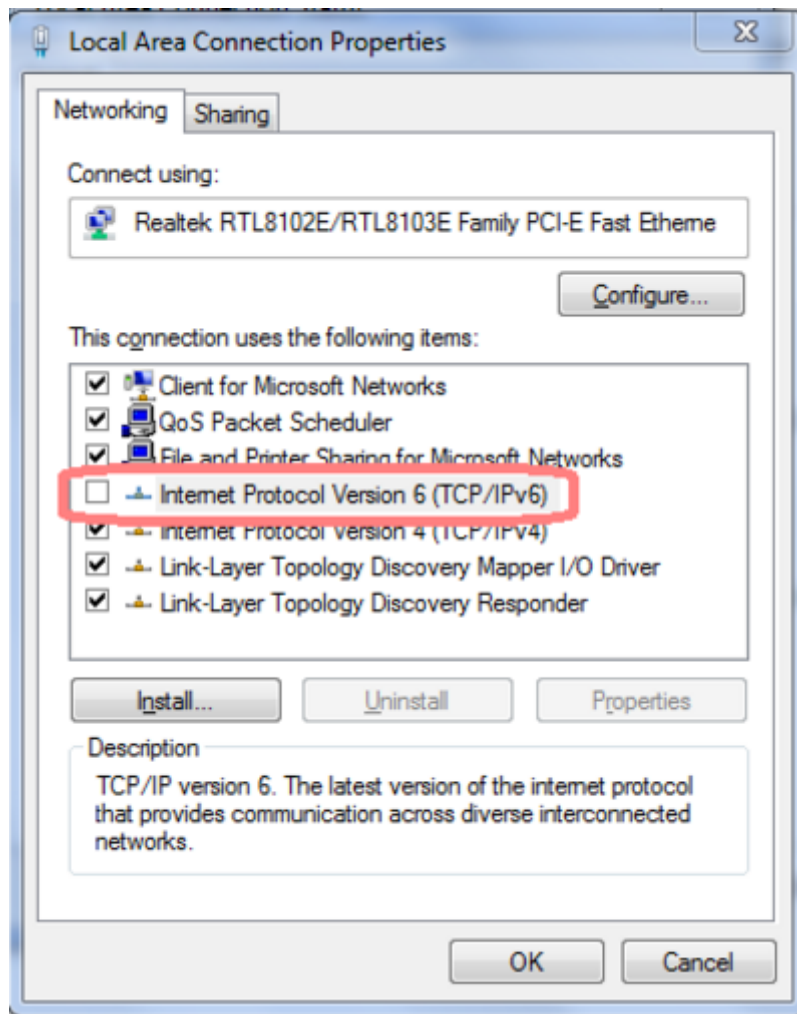

1. Avage „Local Area Connection“ (kui on juhtmega ühendus).
 1. Selleks klõpsake paremas alanurgas asuval „Internet Access“ ikoonil

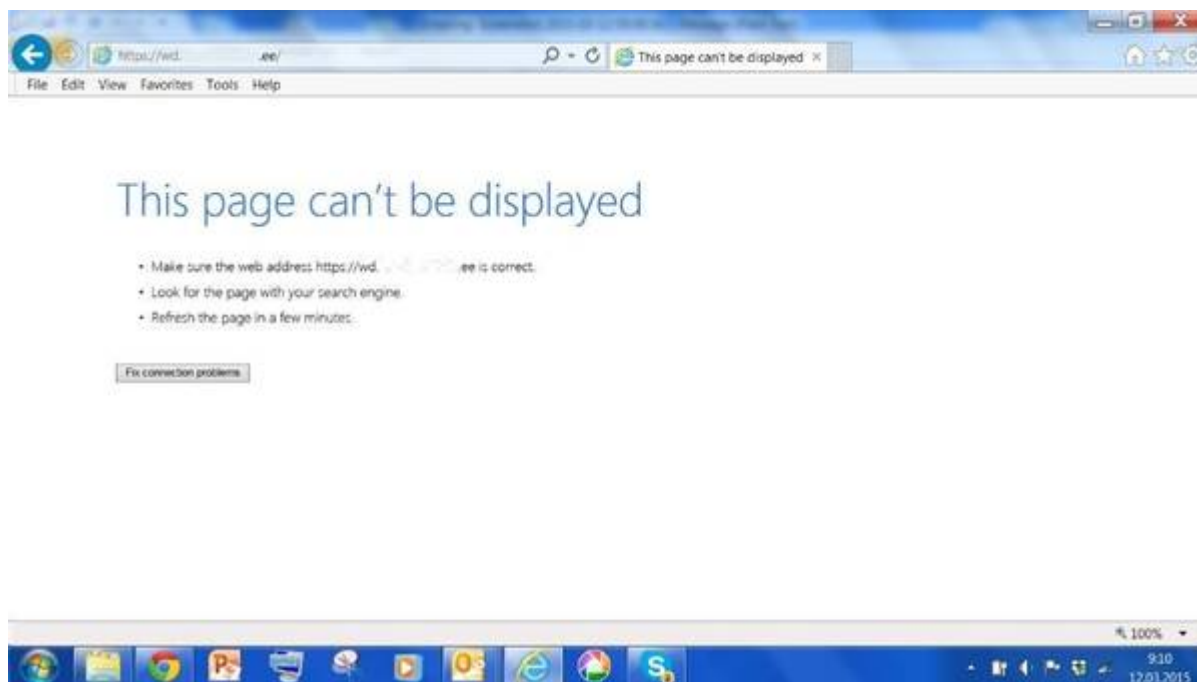

2. Valige „Open Network and Sharing Center“.
3. Klikake „Local Area Connection“.

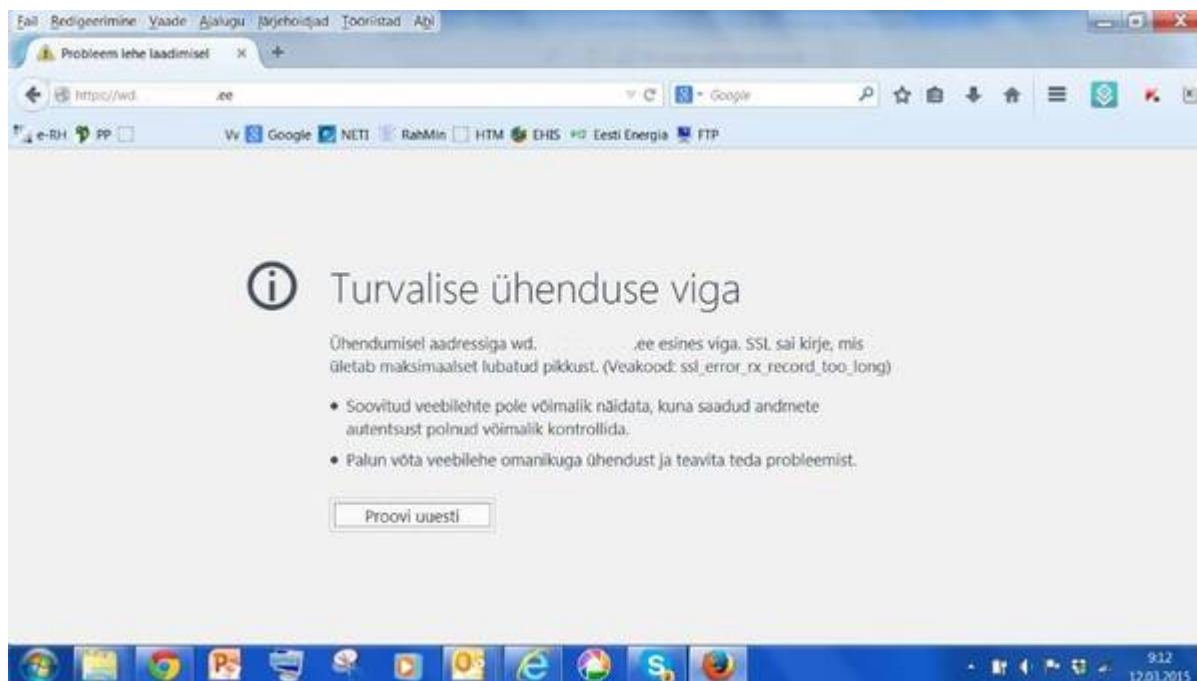

4. Valige „Properties“ ning eemaldage linnuke „Internet Protocol Version 6 (TCP/IPv6)“ ja vajutage „OK“

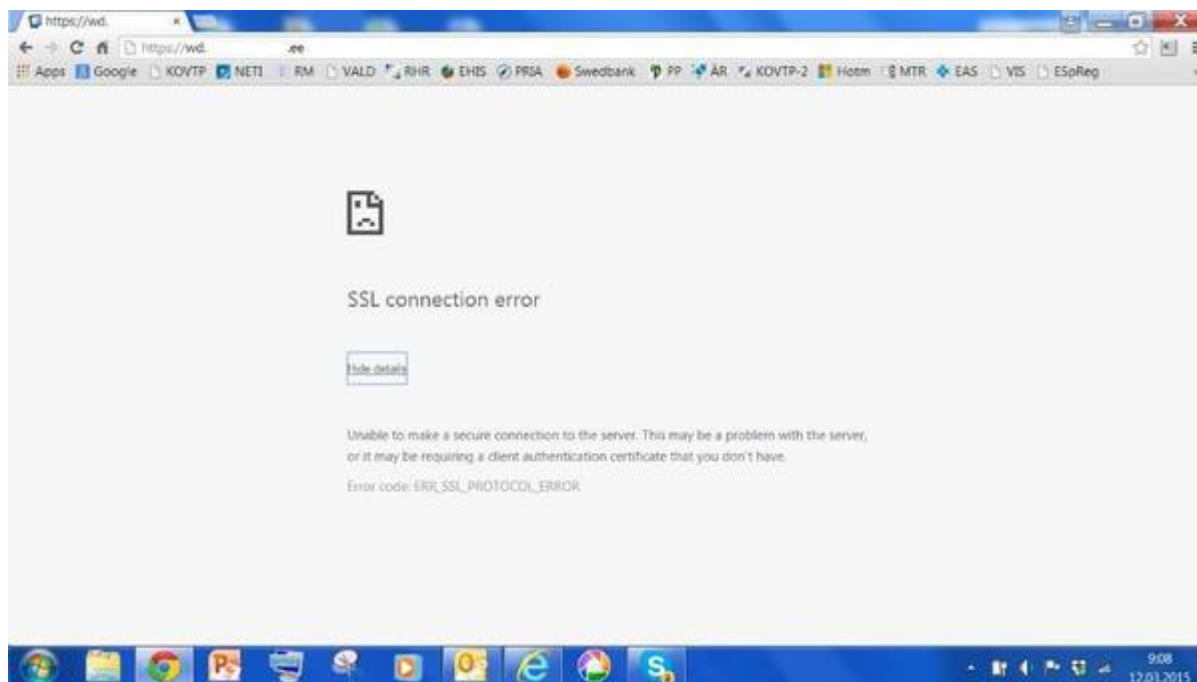

Internet Explorer

Mozilla Firefox

Google Chrome
